Mobboli

**Mobboli presents its new collections for this season:
From the extraordinary simplicity of DAILY to the daring
sophistication of IGGY.**

**From the extraordinary simplicity of DAILY to the daring sophistication
of IGGY**

DAILY, a design by Christophe Pillet, embodies simplicity, comfort and elegance in a collection of chairs and armchairs, perfect for casual installations with a touch of personality. With a wide range of finishes for structure and upholstery, it offers endless possibilities that allow each product and each project to be personalised, from a single colour vision to the greatest colour contrast between upholstery and structure. With simple and light lines, it guarantees comfort with its soft seat and enveloping backrests in two versions, with fixed models with four legs and also a swivel model with the emblematic leg made from sheet steel. A collection of soft and friendly lines to create warm and functional spaces with an excellent quality that is reflected in its details.

IGGY, designed by Patrick Norguet, is a sophisticated and at the same time daring proposal of chairs and armchairs, with or without upholstered armrests, which offers the possibility of combining two different upholsteries, allowing customisations that adapt to the most varied aesthetics and styles. An endless number of options in the choice of colours and finishes, available in all the variants of the MOBBOLI sample book, giving rise to a wide range of models. IGGY offers various types of metal structures: fixed four-legged, sled leg or cantilever; together with the swivel option with aluminium base, fixed and swivel models to combine with fully upholstered seats and backrests, handcrafted, soft and comfortable. A chair that adapts perfectly to our back in its two versions with or without arms. One more example of how distinction and design go hand in hand in ideal proposals for premium installations.

Other collections are expanding their offer: from the functionality of CAP to the summit of MONT BLANC.

The CAP PLASTIC chairs, designed by Ximo Roca, which extends the range of CAP chairs and stools with this new version with seat and backrest in recycled PP polypropylene in different percentages according to a range of six attractive colours: white, black, mink, grey, dry green and terracotta. All available in combination with metal frames from the collection painted to match the PP for a one-colour look or in other colours from the Mobboli metal collection. The CAP collection, now expanded with the plastic version, was awarded the Good Design Award 2021 for its design excellence and, together with the CUA collection of tables - also designed by Ximo Roca - generates the term cap i cua, which in Valencian is synonymous with good luck.

MONT BLANC, a modular design by Yonoh, is a continuation and adaptation of the ALPE collection. A collection that incorporates the curved corner module and the pieces with a single right or left arm to create as many modular soft seating compositions as required. This collection also includes various accessories such as side tables and upholstered side screens to be incorporated into the module in the same finish.

COSMOPOLITAN AND SUSTAINABLE DESIGN

From Madrid to the world. That is the vocation of MOBBOLI furniture. The product, made in Spain with state-of-the-art machinery and a human team that makes possible the development and internal control of all the phases of the process, has the soul of this cosmopolitan, creative and welcoming capital. Furniture designed for contemporary clients, from different cultures, who interact with each other and are aware of the environment. Curious and flexible people, in continuous evolution like the city itself, who move and work in different spaces, always looking for comfort and adaptability.

Born in 2018 from the creative impulse of DELAOLIVA, MOBBOLI is an avant-garde brand that, at the same time, is faithful to a working philosophy of more than 60 years. Because we are all what our genetics dictate. And this is the origin of furniture with its own identity, functional, versatile and with the high quality standards required for commercial, residential and contract use. Cosmopolitan design furniture, created by renowned national and international designers, to equip modern and changing collective spaces that are, at the same time, authentic and welcoming, where good times are the protagonists.

With a strong commitment to sustainability, MOBBOLI is responsible by nature. Raw materials are carefully selected, sustainable and of the highest quality to ensure durability and comfort. The products are guaranteed for five years while their continuity is guaranteed for at least 10 years. In addition, the product manufacturing process is certified to ISO 14001 standards and all products are designed and developed according to Life Cycle Assessment (LCA) and ISO 14006 eco-design standards.

And all always with the aim of creating furniture that will last over time, oriented towards the latest trends and that will dress spaces that reflect us as people and as professionals. To make them places of belonging, full of life and energy, to which we want to return.
